

Product Specifications

Version 1.0 – September 2025

By accepting this Product Specifications document, you acknowledge and confirm that our official legally binding language is English. In the event of any discrepancy or inconsistency between any documentation, information, and communications in any other language other than English, the English documentation, information, and communications shall prevail.

Investor Protection & Disclosures

Risk Warning: CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Negative Balance Protection: All retail clients of Peaksight Ltd. are protected by Negative Balance Protection (NBP). Under no circumstances will a retail client be liable for losses exceeding their deposited funds.

Guaranteed Stop-Loss Orders: Peaksight Ltd. does not currently offer guaranteed stop-loss orders. Clients are responsible for monitoring open positions and ensuring adequate margin is maintained.

Product Governance / Target Market

Peaksight Ltd. conducts regular product governance assessments in accordance with MiFID II (Article 16(3) and 24(2)) and ESMA's Product Governance Guidelines to ensure that its products are marketed and distributed to the appropriate target market. CFDs offered by Peaksight Ltd. are intended for:

- Retail clients with knowledge and experience of leveraged CFD trading.
 - Investors with high risk tolerance who can bear a total loss of their investment.
 - Clients seeking short-term speculative opportunities, not long-term investments.
- Treating Customers Fairly (TCF): Peaksight Ltd. ensures that all communications are clear, fair, and not misleading. The Company monitors client outcomes, trading behavior, and distribution channels to prevent harm and ensure products remain appropriate for their intended audience.

The Product Specifications Explained

Minimum and Maximum Ticket Size:

The minimum and maximum order size is the smallest and/or highest increment accepted and applicable to all order types.

Tick Value:

The "Tick" is the minimum amount that the price or value of an instrument may fluctuate pursuant to the market rules of the relevant regulated market. As profit and loss is converted into the account currency, a "Tick Value" is associated with each product and automatically converted to the clients' accounts currency. For example, if the trading account is denominated in USD, then profit and loss will be calculated in USD. If a client traded in "UK100", which is priced in GBP, our platform will automatically convert profit and loss into USD. The Tick Value conversion rate in this example, would be the GBPUSD exchange rate.

Trading Steps:

“Trading Steps” relates to the minimum order size increment accepted and applicable to all order types. For example, suppose the tick size for an instrument is 0.05. In such case, Clients can trade 0.05, 0.10, 0.15 and so on, lots for this instrument. However, Clients will not be able to trade 0.11 or 0.13 lots.

Contract Size:

Peaksight Ltd utilizes a “Lot” based trading system, which means that all Peaksight Ltd products are aggregated into standardized trade sizes. This simplifies trading by allowing clients to trade in lot increments, and it also provides a price for each lot size rather than averaging open and close prices when multiple positions are taken in the same instrument.

Standard Leverage:

Clients who have been classified as “Retail Clients” upon establishing a business relationship with Peaksight Ltd shall be granted by default the leverages set by the **Cyprus Securities and Exchange Commission**, which are capped at **1:30**.

Minimum Margin Requirements:

Margin requirements differ by the type of instrument and may be subject to change according to the underlying liquidity and volatility of the instrument.

Trading Hours:

Peaksight Ltd trading hours for CFDs products are based on when their underlying reference markets are open, or the times liquidity providing partners are streaming prices. During session hours, clients can set pending orders, open and close trades, and to adjust price levels. Peaksight Ltd CFDs will not be open for trading during holidays in which the reference markets are closed. When the market is closed, clients will not be able to take any action on positions or pending orders.

Session Break:

Clients should also be informed that CFD products may have an intraday break in addition to a daily closing time. Clients will not be able to adjust or close existing positions, or open new positions during the session break. All trading functionalities will cease upon the end of week closing.

Finance Charges - Overnight Rollover (Swaps):

Peaksight Ltd daily interest debit or credit amounts (hereafter “rollover”) are based on the total face value of the open positions, and it will not be debited/credited on a position that is opened and closed on the same trading day. All open positions are rolled automatically to the next trading day. Depending on whether an order is long (buy) or short (sell), it could either be debited or credited with rollover interest daily. Please note that all open positions in all instruments, FX and CFD products, incur a triple (x3) rollover debit/credit on Wednesday at the close of the business day. Bank holidays

will affect the number of days that a position is rolled forward.

Swap Charges Calculation Formula: lots * Swap for Long or Short in base currency

Here's an example:

- Short (Sell) 0.2 Lots EURUSD.
- The Swap for Short is -5.3 EUR (in base currency of the instrument), and the client's account currency is USD.
- Therefore, the Swap Calculation is: $0.2 * -5.3 = \text{€-1.06}$ which is converted to USD based on the current rate of EURUSD.
- Calculation: $\text{€-1.06} * 1.20 = \$-1.27$

Here's an example:

- Short (Sell) position with 10 Lots on the DE30 Index.
- The Swap rate for Short position is -9.63 EUR. The client's account currency is in USD.
- Therefore, the Swap Calculation is: $10 * -9.63 = \text{€-96.3}$ which is converted to USD based on the current rate of EURUSD.
- Calculation: $\text{€-96.3} * 1.20 = \$-115.56$

Contract Expiration

Trades on Futures will be closed on the 'Expiration' date. Clients will need to re-open their positions manually if they wish to continue trading.

Notice

This product summary should be read in conjunction with our Terms and Conditions. Whilst every effort has been made to ensure the accuracy of the guide, this information is subject to change, often without notice and therefore is for guidance only. If you ever have any questions, please contact Peaksight Ltd directly.

Peaksight Ltd does not permit the practice of arbitrage when trading Contracts for Difference (CFDs). Transactions that rely on price latency arbitrage opportunities may be revoked and Peaksight Ltd reserves the right to make necessary corrections or adjustments on the account, without prior notice. In accordance with Peaksight Ltd Terms of Business, accounts that rely on arbitrage strategies may be subjected to intervention, which may include widening the spreads on your account.

Leveraged contracts for difference (CFD) trading carries a high degree of risk and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to trade CFDs you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with CFDs trading and seek advice from an independent financial advisor if you have any doubts.

A contract for difference ("CFD") allows you to potentially profit or loss from the fluctuations in the price of the underlying instrument. The price of a CFD is based on the price of the underlying instrument and is not traded on an exchange, despite the status, or location of the underlying instrument. Therefore, CFD's are an over-the-counter (OTC) product.

There is a substantial risk that stop-loss orders, left to protect open positions held overnight, may be executed at levels significantly worse than their specified price.
